

## VETERINARIANS

Veterinarians are doctors who take care of animals. Most people call them "vets" for short. If your pet was hurt or sick, you would take it to a veterinarian's office to care for it. Veterinarians also give animals shots called vaccinations. Vaccinations help protect our pets from diseases.

### Veterinarians

1. What do veterinarians do?
2. Why are vaccinations important?
3. What do most people call veterinarians for short?
