

FARMERS

Farmers grow the food that we eat. Without farmers we would not have food to eat or milk to drink. Farmers supply the grocery stores with our fruits and vegetables. They work hard to keep their fields and crops healthy. Farmers know a lot about animals and plants!

1. What do farmers do?

2. What do farmers supply our grocery stores with?

3. Why do you think it is important for a farmer to keep their crops healthy?

GARDENERS

Gardeners grow and take care of many types of flowers and trees. They use tools such as flower pots and shovels to do their job.

Gardeners plant flowers and trees, water them and make sure that they are healthy so that they will continue to grow. They also need to make sure to keep the bugs away! Gardeners help keep our community looking nice and alive!

1. What do gardeners do?

2. What types of tools do gardeners use?

3. Why do you think it is important to keep the bugs away?
